
C00 versus its H3 source on the locked ETH validation set
a Paired oracle accuracy
C00 better: 59.1%
C00 minADE (m)
H3 minADE (m)
b Heterogeneous sample-level effects
minADE
Selected ADE
Density
Paired change: C00 − H3 (m)
c Mean effect with paired-bootstrap 95% CI
minADE
minFDE
Selected ADE
Endpoint spread
Negative = lower, desirable for error, contraction for spread
Relative change, C00 vs H3 (%)
d Geometry improves more than score alignment
H3
C00
Fraction
Score rank of minADE candidate
